Summary

The National Citizen Survey™ (The NCS™) is a collaborative effort between National Research Center, Inc. (NRC) and the International City/County Management Association (ICMA). The survey and its administration are standardized to assure high quality research methods and directly comparable results across The NCS communities. The NCS captures residents' opinions within the three pillars of a community (Community Characteristics, Governance and Participation) across eight central facets of community (Safety, Mobility, Natural Environment, Built Environment, Economy, Recreation and Wellness, Education and Enrichment and Community Engagement). This report discusses trends over time, comparing the 2017 ratings for the City of Pasco to its previous survey results in 2005, 2007, 2009, 2011, 2013 and 2015. Additional reports and technical appendices are available under separate cover.

Trend data for Pasco represent important comparison data and should be examined for improvements or declines. Deviations from stable trends over time, especially, represent opportunities for understanding how local policies, programs or public information may have affected residents' opinions.

Meaningful differences between survey years have been noted within the following tables as being “higher” or “lower” if the differences are greater than nine percentage points between the 2015 and 2017 surveys, otherwise the comparisons between 2015 and 2017 are noted as being “similar.” Additionally, benchmark comparisons for all survey years are presented for reference. Changes in the benchmark comparison over time can be impacted by various trends, including varying survey cycles for the individual communities that comprise the benchmarks, regional and national economic or other events, as well as emerging survey methodologies.

Overall, ratings in Pasco for 2017 generally remained stable. Of the 133 items for which comparisons were available, 107 items were rated similarly in 2015 and 2017; five items showed a decrease in ratings and 21 showed an increase in ratings. Notable trends over time included the following:

- Several aspects of Community Characteristics received higher marks in 2017 compared to 2015, and one decreased during that same time period. Ratings for the overall quality of life in Pasco, Pasco as a place to retire, Pasco as a place to live and the overall image of the City all improved in 2017. The rating for Pasco as a place to retire was at an all-time high in 2017.
- Pasco residents also gave more positive ratings to Pasco as a place to work, fitness opportunities, health care, mental health care, education and enrichment opportunities, openness and acceptance of the community and neighborliness in 2017 compared to 2015. Ratings for public parking decreased in 2017.
- Ratings for most aspects of Governance remained stable from 2015 to 2017, however some changes were observed. Survey respondents gave lower marks to snow removal and public information services and gave higher marks to police services, crime prevention and animal control. While the rating for recycling services had been declining since 2005, 2017 showed improvement over 2015.
- Pasco residents also gave higher ratings to their overall confidence in City government and the job the City government does at being honest. These were the highest ratings observed since the questions were first asked in 2013.
- While rates of reported Participation generally remained stable from 2015 to 2017, there were a few significant changes. Fewer Pasco residents reported that they had recycled at home or volunteered in the last 12 months. More residents had carpooled instead of driving alone, walked or biked instead of driving alone, participated in religious or spiritual events or activities and attended a City-sponsored event. Reported rates of volunteerism were at an all-time low in 2017, while attendance at City-sponsored events were the highest yet observed.
